ONICE MIELE

COLOUR

Yellow

MACROSCOPIC DESCRIPTION

Honey Onyx is a crystalline precious material extracted from quarries in Turkey, Iran or Azerbaijan, an onyx particularly suitable for interior design. The yellow ochre background is embellished by brownish shadings and striping, that may sometimes vary to orange, particularity that gives vivacity and originality to the stone. The lighter areas of Honey Onyx are translucent, creating beautiful effects when applied with backlighting.

Honey Onyx is available in blocks and slabs, perfect for specially-made designs and it's perfect for interior designs as floorings, staircases, facings, decorations and decorative objects, and even jewelry. The finishing that best suits Honey Onyx is polishing, thanks to which the beautiful shades of color come to life.
