GREY WOOD

MACROSCOPIC DESCRIPTION

The Grey Wood Marble is a natural stone also known as Wood Stone or White Wood. Similar to serpent-like marble, the background of this material has a unique character: clear and leveled in wooden veins, giving almost the impression of having to do with a different material and not a marble, peculiarity that makes it very recognizable and appreciated for its originality. Grey Wood Marble can be used in indoor or outdoor environments; it is widely used in hotels and residential apartments, such as exteriors, pool fountains, monumental structures, a natural stone that gives elegance, sobriety and originality to every project.
