GREY SAVANNAH

COLOUR

Grey

MACROSCOPIC DESCRIPTION

Savannah Grey marble is a grey tinted Turkish natural stone, that may be sometimes characterized by brown shadings and very fine veins, very popular in the last few years among architects and experts in home and public design. Savannah Grey marble is characterized by a relatively uniform background color, crossed by thin white veins, that may or may not be visible.

Savannah Grey is a natural stone that does not suffer if placed in wet areas and is ideal for floors, design objects, bathroom elements, claddings and facings with a modern and contemporary look. Ideal for both outdoor and indoor applications, whether domestic or commercial. The finishes that best compliment its beauty are polishing, honing, sandblasting and brushing.
