## GRIGIO CARNICO

### **MACROSCOPIC DESCRIPTION**

Grey Carnico marble is a precious natural stone characterized by an intense grey color with important white, light and dark grey veining, alternating to create splendid motives and decorations, a material suitable for many various applications of modern and contemporary style, both for interior design and exterior projects.

Grey Carnico marble is extracted from quarries found in the Friulan Dolomiti Natural Park in Northern Italy, a particular and precious stone expressing the Italian tradition of marble extraction and manufacturing. Grey Carnico can be used for the creation of beautiful and elegant floorings, facades and facings, decorative columns, windowsills, staircases, modern and contemporary tops for kitchens and bathrooms. The finish that best expresses Grey Carnico's beauty is the polished finish that makes the stone the main character of any design.
